Claims 1-5 and 7-35 are cancelled.

Claim 6 is pending.

***Allowable Subject Matter***

Claim 6 is allowable.

The following is an examiner's statement of reasons for allowance:

Based on Hosokawa et al. ("Troglitazone inhibits bicarbonate secretion in Rat and Human Duodenum", Journal of Pharmacology and Experimental Therapeutics, Sep. 1999, page 1080-1081), the inhibition of the alteration of intestinal ion transport (decrease in  $I_{sc}$  short circuit current) would be effective to treat edema cause by troglitazone (a insulin sensitizer) as evidenced by data provided in Table 1 (page 1082). However, the data in Table 1 also shows that the diuretic amiloride does not have the same effect as the diuretic acetazolamide does in terms of decreasing  $I_{sc}$  evoked by troglitazone. Therefore, in examiner's opinion, a skilled artisan would not have been motivated to arrive at the instant invention of claim 6. In addition, the instant application shows an unexpected result in the combination effects of amiloride with compound A (the insulin sensitizer in claim 6) and thereby provided support for the patentability of claim 6.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
